

FOR IMMEDIATE RELEASE

## Delta Computer Systems Introduces Trade Name, New Officers

September 29, 2023 – Battle Ground, Washington – Effective October 1<sup>st</sup>, 2023, Delta Computer Systems, Inc., a manufacturer specializing in industrial hydraulic motion controllers, is formally introducing a new business trade name, Delta Motion.

Also at this time, Delta Motion is pleased to announce a new and expanded slate of officers. Steve Nylund will continue in his role as CEO, while Jacob Paso assumes the position of President, and Wade Nylund has been selected for a new position as Chief Operating Officer. Peter Nachtwey has retired as President but remains on Delta's board of directors.

As the company evolved over the last 40 years, Delta has increasingly focused on the design, production, and sales of its Delta-branded motion controllers. After obtaining a US trademark for Delta Motion, a new logo was introduced in 2022, and adopting the trade name is a natural evolution of this brand refresh process. The Delta Motion name reflects our focus, and our commitment to high-performance products, lasting value, and prompt, knowledgeable customer service and support remains unchanged.

The full legal name remains Delta Computer Systems, Inc., and this will appear on legal documents, often followed by "also doing business as Delta Motion" or "dba Delta Motion". Please contact Delta or refer to the FAQs at [deltamotion.com](http://deltamotion.com) for more information.

Delta's new President, Mr. Jacob Paso, has over 20 years' experience at Delta Motion as the Motion Products Development Manager, responsible for coordinating the development of the RMC Motion Controller products and the complementary RMCTools software, user documentation, and customer training curriculum. Jacob holds a BSEE from the University of Minnesota, and an MSEE from the Norwegian University of Science and Technology and expects to receive his MBA from Washington State University in 2024.

Mr. Wade Nylund has over 20 years' experience in global supply chain management and production operations. As COO, Mr. Nylund is responsible for Delta Motion's day-to-day operations and facilities management, as well as product quality. Wade holds a BS in Manufacturing Engineering from Western Washington University.

"I am very happy with the addition of these officers," says Steve Nylund, CEO. "We have been fortunate to attract and keep talented people over the years, and promoting from within is consistent with Delta's emphasis on continuous, incremental improvement. With these new officers, Delta Motion is well-positioned for continued success in the future."

**About Delta:** For nearly 40 years, Delta has supplied motion controllers and other industrial products that enable better-performing machines. Delta's RMC Motion Controllers are used for servo-hydraulic and servo-electric closed-loop control in a wide array of single and multi-axis control and testing applications.
